Introduction

The 1988 Statistical Yearbook of the Immigration and Naturalization Service represents a continuation of the revisions introduced over the past few years: data are presented in tabular form accompanied by descriptive text, charts, and a map for further illustration. Included again this year are data on the number of applications for legalization received as a result of the Immigration Reform and Control Act of 1986. Data are presented for applications filed during fiscal years 1987 and 1988.

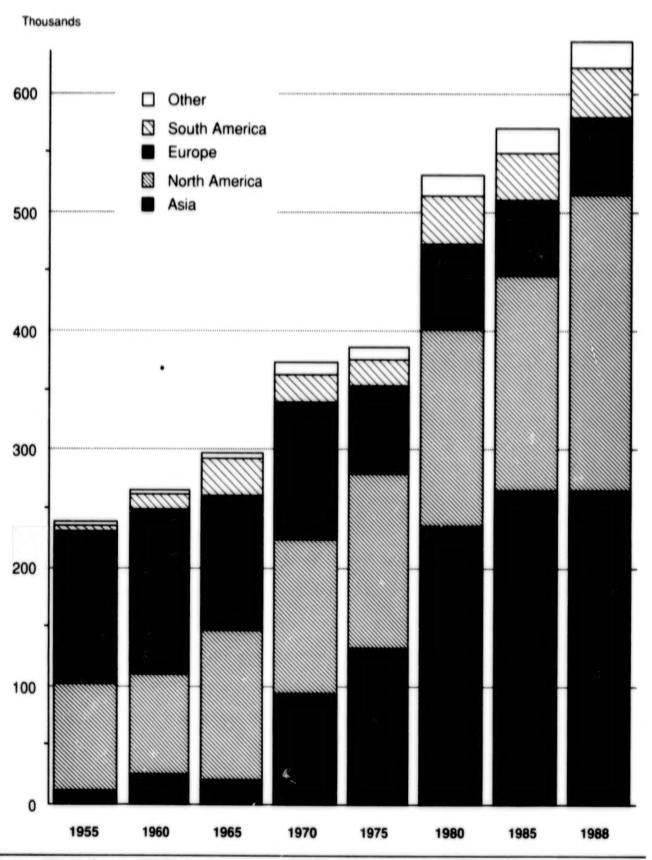

Though data for fiscal year 1988 are featured in this Yearbook, historical data are also furnished. The major areas covered include: immigrants admitted for legal permanent residence; refugees approved and admitted; asylees approved; nonimmigrant arrivals (e.g., tourists, students, etc.); aliens naturalized; aliens apprehended and expelled; and aliens inspected at ports of entry.

The statistics for 1988 reflect a new peak of immigration to the United States after reaching a 50-year high in 1986; an all-time high in the number of tourists to the United States and in the volume of border crossings; and a continued decrease in the number of deportable aliens apprehended. Highlights for 1988 include:

- 643,025 immigrants were admitted 41,509 above the 1987 total; 75,761 of these were admitted under provisions of the Immigration Reform and Control Act of 1986.
- Mexico was the leading country of immigration with 95,039 a 31 percent increase over 1987.
- Asia was the leading region of immigration with approximately 41 percent of the total.
- Nearly three-quarters of all immigrants intended to reside in six states: California, New York, Florida, Texas, New Jersey, and Illinois.
- Haiti was the leading country for refugee adjustments with nearly one-quarter of the 105,276 total.
- 14.6 million nonimmigrants were admitted 74 percent were tourists.
- 62 percent of all nonimmigrants arrived at four ports: New York, Miami, Los Angeles, and Honolulu.
- More than 312,000 foreign students entered the United States.
- 242,063 aliens were naturalized an increase of nearly 7 percent over the 1987 level.
- The Philippines was the leading country of birth for naturalized citizens with 24,903.
- Nearly 50 percent of the naturalized citizens for the period 1981-88 were born in Asia.
- Apprehensions of deportable aliens dropped to 1.0 million a decrease of 200,000 from 1987.
- More than 350 million aliens and citizens entered the United States in 1988 13 percent above 1987.
- San Diego Ports, California showed the highest number of admissions in 1988 with approximately 50 million.
- During 1987 and 1988, 2.5 million aliens applied for legalization; 1.7 million who have continuously resided in the United States since 1982 and 779 thousand who worked in perishable crops.
 - 74 percent were Mexican.
 - 55 percent resided in California.
 - 28 percent resided in the Los Angeles-Long Beach, CA area.

Immigrants Admitted by Region of Birth: Selected Fiscal Years 1955-88

Source: 1981-88, Table 3; 1955-75, previous yearbooks. See Glossary for fiscal year definitions.

I. IMMIGRANTS

Immigrants, as defined by U.S. immigration law, are persons admitted to the United States for legal permanent residence. They are admitted either with immigrant visas issued overseas or by adjusting their status in the United States from temporary to permanent residence. Certain groups of immigrants are subject to annual numerical ceilings, while others are exempt from these limitations.

A total of 643,025 aliens were admitted as immigrants in fiscal year 1988. This number is a substantial increase (41,509) over the total for 1987; however, virtually all of the increase is attributable to new provisions added by the Immigration Reform and Control Act (IRCA) of 1986 (Public Law 99-603). Immigration under the pre-IRCA provisions actually decreased by 18,177 between fiscal years 1987 and 1988 to 567,264. Immigration under the provisions added by IRCA totaled approximately 75,800 in 1988, the first full year that the legislation was in effect. Those admitted include 6.029 nonpreference immigrants whose countries of birth were adversely affected by the Immigration and Nationality Act Amendments of 1965 (2.989 above 1987); 29.002 Cuban and Haitian entrants who entered the United States during the period 1980-81 (24,368 above 1987); 39,999 aliens who have continuously resided in the United States since 1972 (31,939 above 1987); and 731 retired employees of international organizations and their families (357 above 1987).

U.S. Immigration Policy

U.S. immigration law gives preferential immigration status to aliens with a family relationship with a U.S. citizen or legal permanent resident, aliens with needed job skills, or aliens who qualify as refugees. Aliens in other categories account for relatively few admissions. Immigration to the United States can be divided into two general categories: (1) those subject to the worldwide limitations and (2) those exempt from it.

Immigration Subject to the Worldwide Limitation

A maximum of 270,000 immigrants may be admitted annually under the worldwide limitation. Within this overall limitation, no more than 20,000 immigrants may come from any independent country and no more than 5,000 from a dependency. Visa allocation is determined by a system consisting of six preference categories, each with its own numerical limitation (Table A).

Table A
Worldwide Limited Immigrants (270,000 annually)

Preference	Provision	Percent and number of visas
First	Unmarried sons and daughters of U.S. citizens and their children	20% or 54,000
Second	Spouses and unmarried sons and daughters of permanent resident aliens	26% or 70,200*
Third	Members of the professions of exceptional ability and their spouses and children	10% or 27,000
Fourth	Married sons and daughters of U.S. citizens and their spouses and children	10% or 27,000*
Fifth	Brothers and sisters of U.S. citizens (at least 21 years of age) and their spouses and children	24% or 64,800*
Sixth	Workers in skilled or unskilled occupations in which laborers are in short supply in the United States and their spouses and children	10% or 27,000
Nonpreference	Other qualified applicants	Any numbers not used above*

^{*} Numbers not used in higher preferences may be used in these categories

The first, fourth, and fifth preferences are based on the alien's relationship with a U.S. citizen, the second preference is reserved for a spouse or an unmarried child of a legal permanent resident, and the third and sixth preferences are based on needed job skills. Visas may also be issued to qualified applicants who do not fall under one of the six preference categories if all authorized visas have not been used by these preferences during the fiscal year. However, nonpreference visas have not been available since fiscal year 1978 because demand far exceeds available numbers in most preference categories.

Immigration Exempt from the Worldwide Limitation

The major categories of immigrants exempt from the worldwide limitation of 270,000 are listed below.

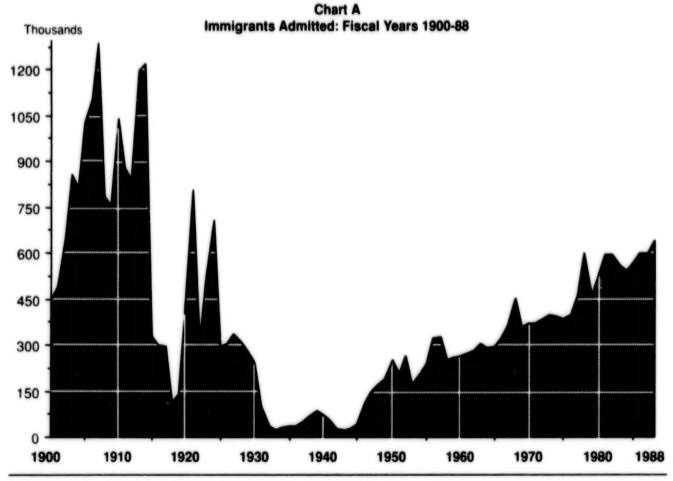

Immediate relatives of U.S. citizens:
 Spouses
 Children (including orphans)
 Parents (of U.S. citizens at least 21 years of age)

- Refugee and asylee adjustments
- Special immigrants:
 Certain ministers of religion
 Certain former employees of the U.S.
 government abroad
 Certain persons who lost U.S. citizenship
 Certain foreign medical graduates
- Babies born abroad to legal permanent residents
- Aliens who have continuously resided in the United States since January 1, 1972

Data Overview

Total Immigration

The number of immigrants admitted during the 1980s has averaged approximately 589,000 per year. During the first decade of the 1900s, when immigration to the United States was at its highest level, annual admissions averaged 880,000. The differences between past and present immigration

Source: Table 1. See Glossary for fiscal year definitions.

levels are more pronounced when comparing rates of immigration relative to the total U.S. population. The average annual number of immigrants admitted from 1981-88 was 2.5 immigrants per thousand U.S. inhabitants. The annual immigration rate during 1901-10 was more than 4 times as great (10.4).

The nadir of U.S. immigration began with the great depression and ended at the conclusion of World War II. Since that time immigration has generally increased, and during fiscal year 1988 it reached its highest total since 1924 (Chart A). Legal immigration is likely to continue to increase in the next few years as aliens are granted permanent resident status under the provisions of the Immigration Reform and Control Act of 1986. Aliens granted temporary residency under the Legalization Program will be eligible to adjust to permanent residence beginning in fiscal year 1989.

Region and Country

Asia had the highest number of admissions in 1988 (41.1 percent). This continues a trend that began with the elimination of country-specific immigration quotas by the Immigration and Nationality Act Amendments of 1965. Immigration from Asia increased after the 1965 Act, while the number of immigrants entering from Europe decreased (Table B).

Asia has had the highest immigrant total every year since 1978, when Indochinese refugees who were paroled into the United States were first allowed to adjust to permanent resident status.

As in the preceding 5 years, Mexico continued as the country of birth with the most immigrant admissions (95.039). Following Mexico were the Philippines (50,697), Haiti (34,806), Korea (34,703), and Mainland China (28,717) (Table C). Worthy of note is that immigrants born in Mexico increased 22,688 between fiscal years 1987 and 1988 and immigrants born in Haiti increased by 19.987. The increases for both countries occurred as a result of IRCA additions. The increase from Mexico is largely due to an increase in the number of aliens admitted under the Registry provision. Registry provision immigrants qualify by having continuously resided in the United States since 1972. The increase from Haiti is due to an increase in the number of refugee adjustments under the Cuban/Haitian entrant provision, all of whom have lived in the United States since 1982. Thus, these two large groups of immigrants do not represent recent net increases to the U.S. population.

Other countries with large increases between fiscal years 1987 and 1988 were Hong Kong (3,840), Laos (3,839), Mainland China (2,876), the Dominican Republic (2,331), Ireland (1,998), and Poland (1,988).

Source: Table 3.

Certain provisions added by IRCA allowed immigrant admissions to increase from Hong Kong and Ireland. The increase from Hong Kong was principally due to the increase of the dependency limitation from 600 in fiscal year 1987 to 5,000 in fiscal year 1988. The increase from Ireland was due to the use of special nonpreference visas made available to persons adversely affected by the Immigration and Nationality Act Amendments of 1965. Almost 40 percent of the 10,000 visas issued went to natives of Ireland.

Categories of Admission

Immigration Subject to the Worldwide Limitation

The number of immigrants admitted subject to the worldwide limitation is relatively constant from year to year since the demand for visas far exceeds the annual limit of 270,000. As of January 1989 there were 2.3 million active registrants awaiting immigrant visas at consular offices abroad. Spouses and

unmarried sons and daughters of legal permanent residents and their families (second preference) accounted for 103,000 of the immigrants admitted in 1988 subject to the worldwide limitation (Table D). The next highest category of admission in 1988 was brothers or sisters of U.S. citizens and their families (fifth preference) with 64,000. The increase in the nonpreference category was due to the delayed use of the 5,000 visas issued in 1987 to persons from countries adversely affected by the Immigration and Nationality Act Amendments of 1965. A total of 5,000 visas were issued for this one-time program in each of fiscal years 1987-88. The increase in the "other" category subject to worldwide limitation was due to an increase in the number of suspension of deportation cases subject to limitations.

Immigrants Exempt from the Worldwide Limitation

The number of immigrants admitted who were exempt from the worldwide limitation increased 14.7 percent between 1987 and 1988. The largest increase in the exempt category was due to the extension of the Registry provision under IRCA. This

Source: Table 4.

provision allows aliens who have resided in the United States continuously since January 1, 1972 to adjust as permanent residents. Previously, aliens had to have been in the country continuously since June 30, 1948 to qualify.

Until 1987 the number of immediate relatives of U.S. citizens admitted during the past decade had increased at an average of 10,000 legal permanent residents per year (Chart B). In 1987 immediate relatives declined by 5,000 and in 1988 they increased by only 800. For the period 1986-88 spouses of U.S. citizens decreased by 4.8 percent, while parents of U.S. citizens increased by 5.0 percent, and children of U.S. citizens increased slightly by .6 percent. Approximately 59.7 percent of the immediate relatives admitted in 1988 were spouses of U.S. citizens, with immigrants from Mexico accounting for 23.5 percent of the spouses. Parents of U.S. citizens were primarily from Asian countries (63.0 percent). Over half of the children of U.S. citizens were born in Mexico, the Philippines, and Korea, and most of the children born in Korea were orphans adopted by U.S. citizens (4,942 orphans out of 5,605 total children).

The annual number of refugee adjustments is dependent on the number of arrivals of refugees in preceding years. The number of refugees and asylees adjusting to legal permanent residence during fiscal year 1988 was almost 15 percent higher than for 1987. Haiti was the leading county of birth for refugees, increasing nearly six times (4,429 to 25,481). Haitian refugees gained permanent resident status through the Cuban/Haitian entrant provision of IRCA. Cuba and Vietnam had been the leading countries of birth for refugees in recent years; however, they fell to third and second place respectively in 1988. The large decrease in the number of Cuban refugee adjustments was caused by the diminishing number of Mariel Boatlift entrants who have yet to adjust their status. Most of the eligible Mariel Cubans have already adjusted to immigrant status under the provisions of the 1966 Cuban Refugee Act beginning in 1985 (15,000) and reaching a peak in 1986 (30,000) and 1987 (27,000). Refugees from Vietnam have maintained a steady stream of adjustments in excess of 20,000 for the past several years. Other notable changes in refugee adjustments between fiscal years 1987 and 1988 were

Chart B Immigrants Admitted as Immediate Relatives of U.S. Citizens: Fiscal Years 1977-88

Source: Table 4.

an increase of 3,789 Laotians (57.8 percent), a decrease of 2,951 Cambodians (-24.2 percent), and an increase of 1,336 Iranians (24.0 percent).

Geographic Distribution

The top 6 states of intended residence for new immigrants during fiscal year 1988 were California, New York, Florida, Texas, New Jersey, and Illinois. These states accounted for over 70 percent of all the immigrants admitted during 1988. These 6 states have been the leading states of intended residence for new immigrants every year since 1971, with California the leading state since 1976. In 1988, almost 3 in 10 immigrants intended to reside in California. The leading metropolitan areas of intended residence were New York, NY (93,106), Los Angeles-Long Beach, CA (88,211), Miami-Hialeah, FL (38,259), Chicago, IL (21,183), and Washington, DC-MD-VA (18,032). California cities account for 5 of the top 10 areas of intended residence; Los Angeles-Long Beach, San Francisco, Anaheim-Santa Ana, San Diego, and San Jose.

Sex and Age

Slightly more male than female immigrants were admitted in 1988 (324,521 males and 318,504 females). A comparison of age distributions shows that immigrants are relatively more concentrated in the age groups from 20 to 34 years of age than the total U.S. population (Chart C). In 1987 the median ages for the total U.S. population were 30.9 for males and 33.2 for females. Male and female immigrants were younger, both with a median age of 28.7.

Occupation

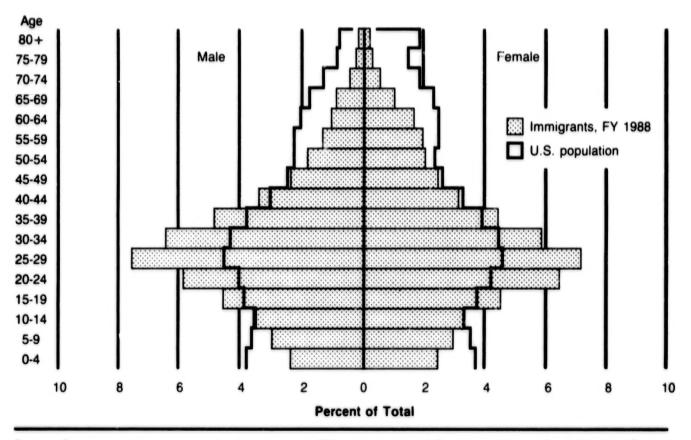

Approximately 44 percent of all immigrants admitted in 1988 reported having an occupation. Immigrants qualifying for immigrant status based on their job skills under the occupational preferences, which constituted only 2.0 percent of total admissions, enter the U.S. workforce in their reported occupations as shown in Table 19. These immigrants are composed of two groups: (1) members of the professions of exceptional ability (third preference), and (2) workers in skilled or unskilled occupations in which laborers are in short supply in the United States (sixth preference). The remaining immigrants have reported either the occupation in their last job before immigration or the occupation they have been trained in or are qualified to perform.

The leading occupational groups for third preference immigrants are engineers, surveyors, and mapping scientists (2.772); executive. administrative, and managerial occupations (2,244); postsecondary school teachers (1,005); and nurses (660). The leading groups for sixth preference immigrants are service occupations (4,646); executive, administrative, and managerial occupations (1,312); precision production, craft, and repair occupations (1,190); and operators, fabricators, or laborers (762). For both third and sixth preference immigrants, labor certifications from the Department of Labor are generally required, indicating that the entry of such persons will not adversely affect U.S. workers' wages or working conditions.

Data Collection

Aliens arriving from outside the United States (new arrivals) generally must have a valid immigrant visa issued by the U.S. Department of State to be admitted for legal permanent residence. Aliens already in the United States in a temporary status who are eligible to become legal permanent residents (adjustments) are

Chart C
Percent Age and Sex Distribution of U.S. Population and Immigrants Admitted in Fiscal Year 1988

Source: U.S. population data are provisional estimates for July 1, 1987 published by the U.S. Bureau of the Census, Current Population Reports, Series P-25, No. 1022; immigrants, Table 11.

granted immigrant status by the U.S. Immigration and Naturalization Service. The source of information on new arrivals is the immigrant visa (OF-155, Immigrant Visa and Alien Registration, U.S. Department of State) and the source of information on adjustments is the form granting legal permanent residence (I-181, Memorandum of Creation of Record of Lawful Permanent Residence, U.S. Immigration and Naturalization Service). After the immigrant is admitted, the immigrant visa and adjustment forms are forwarded to INS' Immigrant Data Capture (IMDAC) Facility for processing. The IMDAC facility generates statistical records which are the source of the statistics on immigrants presented in this report. The variables collected include: port of admission; type (or class) of admission; countries of birth, last residence, and nationality; age, sex, and marital status; occupation; original year of entry and class of entry for those adjusting from temporary to permanent residence; and the zip code of the immigrant's intended residence.

Limitations of Data

The number of immigrants admitted for legal permanent residence in a year is not the same as the number of net migrants who entered the United States in the year. The reasons for the difference in counts are:

- 1) Immigrant adjustments are reported in the year the aliens adjust their status to legal permanent residence and not in the year they migrate to the United States.
- 2) Some immigrants (such as refugees and asylees) may never be counted as legal permanent residents even though they are permanently residing in the United States (i.e., they are not required to adjust to permanent resident status).
- Information on emigration (aliens permanently departing the United States) and information on net illegal immigration is not collected (see Data Gaps section).

Most immigrants adjusting to legal permanent residence entered the United States on a permanent basis prior to their year of adjustment. Data on year of last arrival for adjustments and for new arrivals appears in Table 10. Of those adjusting status, approximately 96 percent of the aliens admitted for legal permanent residence in fiscal year 1988 last entered the United States in calendar year 1987 or earlier. Many of these adjustments are refugees who legally must wait one year before applying for permanent residence status, and therefore, do not appear as immigrants until they adjust their status. Some refugees may never appear as immigrants because they do not apply for permanent residence.

The number of emigrants and net illegal migrants is unknown; however, estimates have been developed by the U.S. Bureau of Census to estimate national population totals. The Census Bureau estimates that total emigration (native and foreign-born) since 1980 is 160,000 per year. The available research indicates that the net increase in the illegal population was in the 100,000 to 300,000 range annually during the early 1980s. The Census Bureau uses an estimate of 200,000 net growth due to illegal immigration in its annual population estimates.

II. LEGALIZATION APPLICANTS UNDER THE IMMIGRATION REFORM AND CONTROL ACT OF 1986

The Immigration Reform and Control Act of 1986 allows two groups of illegal aliens to become temporary and then permanent residents of the United States: aliens who have been in the United States unlawfully since January 1, 1982 (legalization applicants) and aliens who were employed in seasonal agricultural work for a minimum of 90 days between May 1985 and May 1986 (Special Agricultural Worker (SAW) applicants). The application period for temporary residency for legalization applicants began on May 5, 1987 and ended on May 4, 1988, while the application period for SAW applicants began on June 1, 1987 and ended on November 30, 1988. As of May 12, 1989, the INS has received applications from 1,768,089 legalization applicants and 1,301,804 SAW applicants. These figures are not final because some SAW applications are still being processed and certain individuals born in countries granted blanket Extended Voluntary Departure status may apply for legalization until December 22, 1989. The Statistics presented in this *Yearbook* are limited to the two year period ending September 30, 1988 (i.e., the 1,694,957 legalization and 778,885 SAW applications filed and processed during fiscal years 1987 and 1988).

Data Overview

Legalization Applicants

Most of the applications filed under the legalization program were submitted by Mexican aliens. Aliens from Mexico submitted 1,188,619 applications followed by El Salvador (138,257), Guatemala (50,504), Colombia (24,783), the Philippines (18,444), the Dominican Republic (16,796), Nicaragua (15,538), and Haiti (15,322). Applicants from North America account for about 88 percent of the total: Mexico (70.1 percent), Central America (13.4), and the Caribbean (3.3). The leading continents after North America are Asia (4.6 percent), South America (4.1), Europe (1.9), Africa (1.7), and Oceania (.2). Overall, 82.2 percent of the aliens entered without inspection and 17.8 percent entered as nonimmigrants who subsequently overstayed their visas. The principal manner of entry for aliens from North and Central America was without inspection (89.3 percent) while others entered as nonimmigrants (68.1).

The legalization applicants are highly concentrated in a few states and metropolitan areas of residence. The 5 leading states, which account for about 7 out of 8 applications, are California (54.7 percent), Texas (17.9), Illinois (6.9), New York (6.7), and Florida (2.8) (Map, p. x). These same 5 states have been the leading states of intended residence for legal immigrants for the past 15 years. About 1 in 3 applicants reside in Los Angeles-Long Beach, CA, which has twice as many applicants as Texas, the second highest state. Half of the top 10 metropolitan areas of residence are in California: Los Angeles-Long Beach, Anaheim-Santa Ana, Riverside-San Bernardino, San Diego, and San Jose. The only other state with more than 1 of the 10 leading metropolitan areas is Texas, with Houston and Dallas. The remaining areas are Chicago, IL, New York, NY, and Miami-Hialeah, FL.

Legalization applicants are primarily between the ages of 15 to 44 (80.7 percent) and have a median age of 30 years. Males account for 56.9 percent of the applicants. Approximately 41.5 percent of the applicants are married, 48.7 percent have never been married, and the remaining 9.8 percent are separated, divorced, or widowed or have an unknown marital status.

The application form requires all legalization applicants to enter their occupation (present or most recent job). The most frequent occupations reported are operators, fabricators, or laborers (24.3 percent) and service occupations (21.4 percent). Only 4.0 percent of the legalization applicants reported working in farming, forestry, or fishing occupations. Approximately one in five of the applicants are homemakers, children, unemployed, or retired.

SAW Applicants

Mexican aliens constitute 83.4 percent of the 778,885 applicants who filed for SAW status during fiscal years 1987 and 1988. The country with the second highest number of applications is Haiti with 4.5 percent, while all other countries account for only 12.1 percent of the total. Four of the top ten countries are located in Asia: India (1.3 percent), Pakistan (1.1), Korea (.5), and the Philippines (.5). The remaining top ten countries are located in the western hemisphere: El Salvador (1.8 percent), Guatemala (1.3), Jamaica (.6), and Colombia (.4).

Many of the SAW applicants migrate from state to state according to the growing season; therefore, the population in a state at any given time may differ from the data from the application forms. The leading states of residence for SAW applicants at the time of application are California (55.0 percent), Florida (10.5), Texas (8.2), New York (3.2), and Washington (2.8). The leading metropolitan areas of residence are Los Angeles-Long Beach, CA (12.9 percent), Miami-Hialeah, FL (4.2), San Diego, CA (4.9), Riverside-San Bernardino, CA (4.1), Fresno, CA (3.4), and Anaheim-Santa Ana, CA (3.3).

The number of SAW applicants who applied for Group I status during fiscal years 1987 and 1988 (worked at least 90 days during the 3 year period ending in May 1984, 1985, and 1986) is about 74,000, well below the limit of 350,000. Mexicans have accounted for 88 percent of the Group I applicants. The number of applicants in the less restrictive Group II category is 702,500. Aliens qualifying for Group I status will be eligible for permanent resident status on December 1, 1989, while those in Group II will be eligible one year later on December 1, 1990.

The SAW applicants reported working on the following types of crops: fruits and tree nots (38.2 percent), vegetables and melons (29.8), held crops (6.0), cash grains (5.7), and horticultural specialties (4.0). Applicants failed to report a specific type on 15.1 percent of the applications.

SAW applicants are concentrated in the ages between 20 and 39 (76.5 percent) and have a median age of 28 years. Approximately 83.5 percent are male; 42.5 percent are married.

Data Collection

The data on legalization and SAW applicants are reported on INS' application forms and maintained in the Legalization Applicant Processing System (LAPS) data base. Aliens who have been in the United States since 1982 applied with Form I-687 "Application for Status as a Temporary Resident". Aliens applying under the SAW program use Form I-700 "Application for Temporary Resident Status as a Special Agricultural Worker (SAW)". The LAPS data base contains selected items from each alien's application form.

Limitations of Data

All applicants are included in this section regardless of the dispositions of their cases. Each application is initially recommended for approval or denial by an officer at a legalization office; the applicant receives a final decision after the information is processed at a Regional Processing Facility. As of May 9, 1989, approximately 80 percent of the legalization applicants and 48 percent of the SAW applicants had received a final decision. Of those applicants with a final decision, 97.2 percent of the legalization applicants and 94.8 percent of the SAW applicants had been approved for temporary resident status.

III. REFUGEES

The Immigration and Nationality Act, as amended by the Refugee Act of 1980, governs the admission of refugees into the United States. A refugee, as defined by the Act, is any person who is outside his or her country of nationality who is unable or unwilling to return to that country because of persecution or a well-founded fear of persecution. Claims of persecution may be based on the alien's race, religion, nationality, membership in a particular social group, or political opinion. Persons within their country of nationality may be treated as refugees, provided that the President has defined these countries as having special refugee circumstances, after consultation with Congress. The definition of refugee set forth in the Refugee Act of 1980 conforms to that of the 1967 United Nations Protocol on Refugees.

The authorized ceiling for refugee admissions was increased from 70,000 in 1987 to 87,500 in 1988. The ceiling for Eastern Europe and the Soviet Union was raised from 12,300 to 30,000, composing the major change in the authorized admission levels. The number of refugees approved by INS for

admission to the United States rose by over 30 percent from 1987 (61,529) to 1988 (80,282). These approvals increased for three areas of chargeability — East Asia, Eastern Europe and the Soviet Union, and Latin America and the Caribbean. Vietnam (22,120), the Soviet Union (18,833), and Laos (15,322) were the leading nationalities for refugee approvals. Following the pattern for approvals, refugee arrivals into the United States for 1988 (80,382) increased by 20 percent over the 1987 level (66,803). The three leading nationalities were the Soviet Union (20,533), Vietnam (17,626), and Laos (14,561), composing nearly two-thirds of refugee arrivals for 1988.

Refugee adjustments to lawful permanent resident status increased by 15 percent from 1987 (91,474) to 1988 (105,276). Haiti led all countries for refugee adjustments with 25,476, nearly one-fourth of the adjustments for the year. This represents approximately a sixfold increase over the 4,419 Haitian refugees adjusting in 1987. Haitians primarily have adjusted under the Cuban/Haitian Entrant provision of the Immigration Reform and Control Act of 1986. The law authorized the adjustment of Cubans and Haitians who entered the United States prior to January 1, 1982, provided they have resided in the country since that date. Nearly 90 percent of the refugees adjusting under this provision were born in Haiti, since Cubans have been eligible to adjust status under the Cuban Refugee Adjustment Act of 1966.

U.S. Refugee Policy

Before each fiscal year, the President, in consultation with Congress, reviews the worldwide refugee situation, determining the number of refugees in need of resettlement, those who are of special humanitarian concern to the United States, and the authorized number of admissions for the ensuing fiscal year. The admission ceiling of 87,500 for 1988 was divided among the geographic regions as follows:

Africa	3,000
East Asia	38,000
Eastern Europe and Soviet	
Union	30,000
Latin America and Caribbean	3,500
Near East	9,000
Unallocated reserve	4.000

The authorized admission levels are the maximum number of refugees allowed to enter the United States in a fiscal year for each of the geographic areas of chargeability. The unallocated reserve was established in 1987 so that additional refugees could be admitted with private sector funding. In 1988, approximately 700 Cuban refugees were admitted under this procedure.

Refugees are processed and approved for admission to the United States by Immigration and Naturalization Service officers from the Service's fourteen overseas offices. In order to qualify for admission to the United States as a refugee, each applicant must meet all of the following criteria: be a refugee as set forth in the Refugee Act of 1980; be among the types of refugees determined to be of special humanitarian concern to the United States; be admissible under the Immigration and Nationality Act; and not be firmly resettled in any foreign country.

Under the Refugee Act of 1980, refugees are eligible to adjust to lawful permanent resident status after one year of residence in the United States and are exempt from the worldwide annual limitation of 270,000 immigrants. Upon adjustment, the date of admission is recorded as the date of entry as a refugee, so that the length of time spent in refugee status is counted toward the residency requirement for naturalization purposes.

Data Overview

The United States first recognized refugees for entry into the country in fiscal year 1946. Since that time there have been many different refugee programs enacted on an ad hoc basis, such as the Displaced Persons Act and the Cuban and Indochinese Refugee Adjustment Acts. During the first decade of refugee programs, virtually all refugees entered the United States as immigrants. Since 1957, most refugees either have been paroled into the United States under special authority granted to the Attorney General by the Immigration and Nationality Act, or have entered in refugee status, to be adjusted to immigrant status at a later date. Chart D depicts initial refugee admissions and admissions to lawful permanent resident status for the period 1946-88. This graph demonstrates the time lag between initial admission and adjustment to immigrant status. At the onset of parole programs there generally were no mechanisms for adjustment to permanent status, thus creating a need for special legislation.

In the 43-year history of U.S. refugee admissions, over 2.3 million refugees have been granted lawful permanent resident status in the United States. Concomitantly, more than 15.9 million immigrants have been admitted. For the period 1946-88, the percentage of immigrant admissions composed of refugees was 14.6 percent. When the data are examined by continent and country, different patterns emerge. The following table delineates the number of refugees admitted for the 1946-88 period, the number of

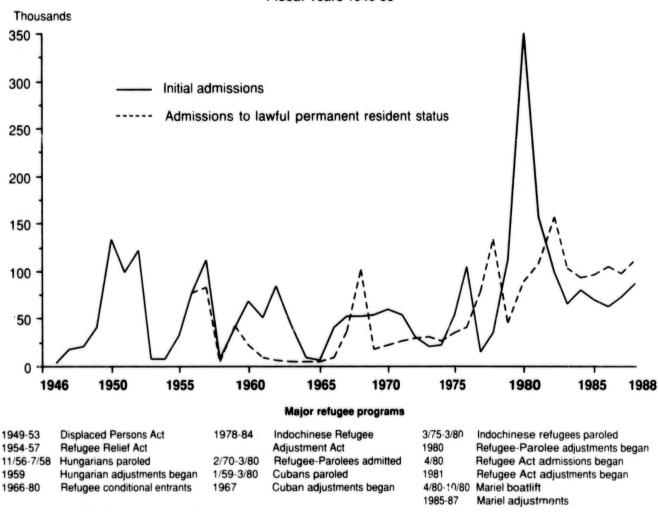

immigrants admitted for the period, and the percentage of immigrants admitted as refugees, by continent. Asia and Europe are the two leading continents, with more than 19 percent of immigrants admitted as refugees.

Percentage of Immigrant Admissions Composed of Refugees, 1946-88

Continent	Refugees	Immigrants	Percent
Total	2,323,612	15,905,212	14.6
Europe	899,290	4,664,579	19.3
Asia	868,586	4,429,403	19.6
Africa	27,937	280,960	9.9
Oceania	161	106,672	.2
North America	524,485	5,514,516	9.5
South America	3,020	908,407	.3
Unknown	133	675	19.7

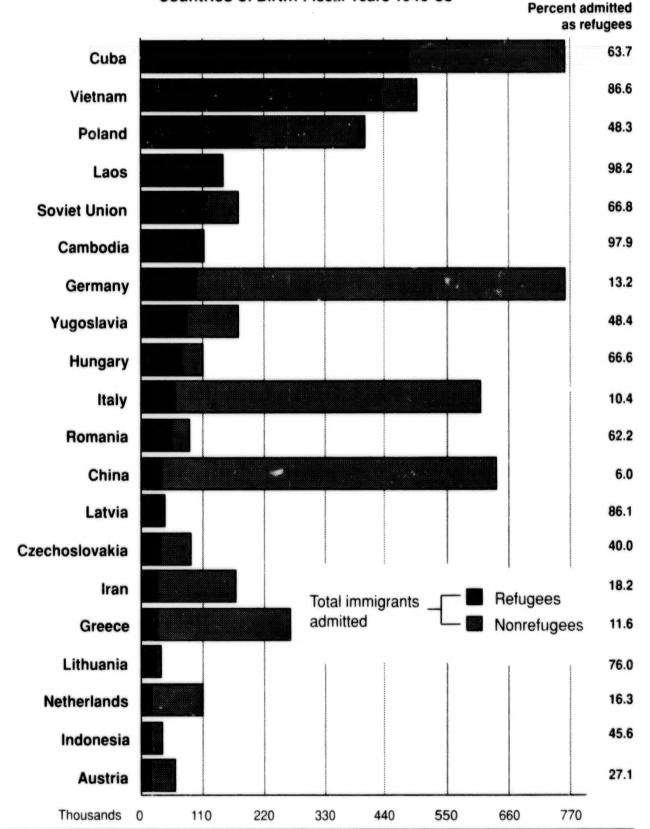

Chart E depicts the percentage of total immigrants admitted as refugees for the top twenty refugee countries of birth for the period 1946-88. This chart illustrates the different types of refugee movements which have occurred during the period. Refugee flows can be categorized into three types of movements — countries with high, medium, or low percentages of immigrants entering as refugees. The countries with high percentages are Laos, Cambodia, Vietnam, Latvia, Lithuania, and the Soviet Union, with more than two-thirds of immigrants having been admitted as refugees. The Indochinese countries currently constitute the primary source of refugee movement to the United States. These countries had little other regular immigration prior to the onset of refugee admissions and now have small amounts of regular immigration concurrent with the refugee flows. The middle range consists of Hungary, Cuba,

Chart D
Refugee and Asylee Initial Admissions to Lawful Permanent Resident Status:
Fiscal Years 1946-88

NOTE: For the period 1946-56, admissions to lawful permanent resident status and initial admissions were the same. See Glossary for fiscal year definitions.

Chart E
Number and Percent of Immigrants Admitted as Refugees for Top Twenty Refugee
Countries of Birth: Fiscal Years 1946-88

NOTE: Germany includes East and West Germany. China includes Mainland China and Taiwan. See Glossary for fiscal year definitions.

Source: Table 38. Immigrant data: 1977-88, Table 3; 1946-76, previous yearbooks.

Romania, Yugoslavia, Poland, Indonesia, and Czechoslovakia, with refugee admissions constituting between 33.3 and 66.7 percent of immigrant admissions. These countries have had more long-term flows of both refugees and regular immigrants, as in the case of Cuba. At the low end of the scale are Austria, Iran, the Netherlands, Germany, Greece, Italy, and China. In these countries, although refugee flows may have been large, regular immigration has been fairly constant, while some countries (Germany, Italy, and China) have been primary sources of regular immigrants during a major portion of the 1946-88 period.

Data Collection

The Immigration and Naturalization Service collects data on refugees at three points during their processing: when they apply for refugee status abroad, when they are admitted to the United States, and when they adjust to lawful permanent resident status. The INS overseas offices collect data on applicants for refugee status. Each office submits INS Form G-319, Report of Applicants for Refugee Status under Section 207, which reports refugee casework by the country to which each applicant is chargeable.

Since 1987, data on refugee admissions have been collected through the Nonimmigrant Information System (NIIS). The system compiles refugee admissions by country of citizenship on a monthly basis from INS Form I-94, Arrival/Departure Record (see Nonimmigrants section). Since NIIS records each entry of a person with nonimmigrant status, a refugee traveling abroad and returning to the United States may be counted more than once during the fiscal year. As a result, the data on refugee admissions may overstate the number of initial admissions of refugees for a fiscal year. comparison of NIIS data to data collected by other agencies shows that for 1988, approximately three to five percent of the total refugee arrivals are not initial admissions, but are refugees returning to the United States.

Both the Bureau for Refugee Programs (Department of State) and the Office of Refugee Resettlement (Department of Health and Human Services) also collect data on refugees admitted to the United States. The Bureau for Refugee Programs collects data through the Intergovernmental Committee for Migration, which is responsible for compiling the total number of refugees admitted to the United States. The Office of Refugee Resettlement, which is responsible for the disbursement of funds for refugee

benefits, collects detailed data on the characteristics of refugees initially admitted to the United States.

The Immigration and Naturalization Service collects data on refugees adjusting to lawful permanent resident status as part of its immigrant data series gathered by the Immigrant Data Capture System (IMDAC). The data collected include demographic variables as well as immigration-oriented variables (see Immigrants section). This is the only stage in the refugee process where the INS collects detailed information about the characteristics of refugees in the United States.

IV. ASYLEES

The Refugee Act of 1980 regulates U.S. asylum policy in addition to governing refugee procedures. The Act, for the first time, established a statutory basis for granting asylum in the United States consistent with the 1967 United Nations Protocol on Refugees. The definition of an asylee conforms to that of a refugee. The only difference is the location of the alien upon application; the asylee is in the United States or at a port of entry and the refugee is overseas.

U.S. Asylum Policy

Any alien physically present in the United States or at a port of entry may request asylum in the United States. According to the Refugee Act, current immigration status, whether legal or illegal, is not relevant to an individual's asylum claim. An alien requesting asylum may apply in one of two ways: with an INS district director, or, if apprehended, with an immigration judge in a deportation or exclusion hearing.

Asylum regulations require that an INS officer interview each applicant and consult the Bureau of Human Rights and Humanitarian Affairs (Department of State) for an advisory opinion on every asylum case. There are no limits set by law as to the number of individuals who may be granted asylum in the United States in a fiscal year. An alien denied asylum by the INS may renew the asylum request with an immigration judge during a deportation or exclusion hearing.

According to immigration law, an asylee must reside in the United States for one year to be eligible to apply for adjustment to lawful permanent resident status. Although exempt from the worldwide annual limitation of 270,000 immigrants, only 5,000

asylees may adjust each year. One year of the asylee's residence prior to adjustment is counted toward the naturalization residency requirement.

Two major developments during 1987 continued to affect asylum data in 1988 - the U.S. Supreme Court decision in INS v. Cardoza-Fonseca on March 9, 1987 and the Attorney General's memorandum regarding Nicaraguans in the United States. Cardoza-Fonseca the Supreme Court decided that the United States has followed too strict a standard in determining an alien's eligibility for asylum. The Court ruled that the proper standard for qualifying for asylum is a well-founded fear of persecution, rather than the clear probability of persecution standard used in determining withholding of deportation. An alien should be eligible for consideration for asylum if his or her fear of persecution is reasonable. However, an applicant who establishes a reasonable possibility of persecution is not automatically entitled to asylum in the United States, since the granting of asylum remains at the discretion of the Attorney General.

On July 8, 1987, the Attorney General issued guidelines to the INS concerning Nicaraguans living in the United States. The memorandum was issued to ensure that individuals with a well-founded fear of persecution in Nicaragua be allowed to remain in the United States for the present time and be allowed to support themselves while here. Additionally, those Nicaraguans who were denied asylum were encouraged to reapply for reopening of their claims, in light of the *Cardoza-Fonseca* decision. Although the memorandum specified Nicaraguans, it actually was a restatement of immigration policy applicable to all nationalities.

Data Overview

In fiscal year 1988 the number of asylum applications filed with INS more than doubled over the 1987 filings, increasing from 26,107 to 60,736 cases. Both El Salvador and Guatemala showed tenfold increases in asylum applications for 1988. El Salvador rose from 2,684 applications to 27,048, while Guatemala increased from 640 to 6,384 applications. Applications filed by Nicaraguans also rose from 13,377 to 16,170. These increases in asylum cases filed continued a trend which began in 1987 following the U.S. Supreme Court decision in INS v. Cardoza-Fonseca and Attorney General Meese's memorandum concerning Nicaraguans in the United

States. The number of individuals granted asylum increased by over 40 percent from 1987 (5,093) to 1988 (7,340). For the second year, Nicaragua was the leading nationality for individuals granted asylum, with 3,725, while Iran followed with 1,107.

For the fifth straight fiscal year, asylee adjustments to lawful permanent resident status reached the 5,000 annual limit. Iran remained the leading country of birth with over 55 percent of the adjustments; Nicaragua followed with 11 percent; while Poland had over 9 percent. Since there is an expanding pool of approved asylees in the United States (those approved either by the INS or by immigration judges), asylee adjustments are expected to continue to reach the 5,000 limit.

Data Collection

The data on asylum applicants reflect those cases filed with INS district directors as reported on INS Form G-23.3 Supplement A (Asylum Cases Filed with District Directors Pursuant to Section 208 INA). Each office reports asylum casework according to the nationality of asylum applicants. In addition to cases granted, the number of individuals covered by those cases is collected, since one case may cover more than one person. Data on asylum applicants have been collected by the INS for selected nationalities since July 1980, and since June 1983 for all nationalities.

As with refugees, the Immigration and Naturalization Service collects data on asylees adjusting to lawful permanent resident status in the Immigrant Data Capture System (IMDAC) (see Immigrants section). Adjustment to immigrant status is the only point at which detailed characteristics of asylees are collected.

Limitations of Data

Data on applicants for asylum collected by the Immigration and Naturalization Service cover only cases filed with the INS. The data do not cover those cases filed by apprehended aliens or the cases denied by the INS which were renewed with immigration judges, who are part of the Executive Office of Immigration Review in the Department of Justice. However, the data collected by the INS at the time asylees adjust to permanent resident status cover aliens previously granted asylum by either district directors or immigration judges.

V. NONIMMIGRANTS

A nonimmigrant is an alien admitted to the United States for a specified temporary period of time but not for permanent residence. While the typical nonimmigrant is a tourist who visits for a few days to several months, there are numerous classes of nonimmigrant admission, ranging from students to ambassadors. A total of 14.6 million nonimmigrant admissions were counted during fiscal year 1988. This represents an increase over 1987 of more than two million (18.9 percent). This is the largest number of nonimmigrants admitted to the United States in any year.

Nonimmigrant Admission

Nonimmigrants were first defined in the Immigration Act of 1819, but it was the Act of 1855 which first required that official reports show "temporary arrivals" separately. The Act of 1924 defined several specific classes of admission which have been expanded in subsequent immigration acts. Though "tourists" (temporary visitors for pleasure) have consistently been by far the most numerous nonimmigrant class of admission to the United States, a wide variety of temporary visitors now fall within the nonimmigrant classification. Second in volume to tourists are business people coming to the United States to engage in commercial transactions (though not for employment in the United States). Other categories of admission make up a much smaller share of nonimmigrants, such as foreign students and temporary workers. Nonimmigrants in the latter category are admitted to the United States to perform services of an exceptional nature requiring distinguished merit and ability (such as athletes or entertainers) or to perform temporary services or labor when unemployed persons capable of performing such services or labor cannot be found in this country (such as agricultural laborers). Also granted authorization to work in the United States are exchange visitors who enter this country temporarily to study, teach, or conduct research; intracompany transferees, to render temporary managerial or executive services in the United States to international firms or corporations; and industrial trainees. Though not strictly considered as employed in the United States, treaty traders and treaty investors enter temporarily to conduct trade or to substantially invest in enterprises under the provisions of treaties of commerce and navigation between the United States and foreign states.

Nonimmigrants also include several types of temporary visitors who are connected in some way with a foreign government or who represent an international

organization. Ambassadors, public ministers, diplomats, and consular officers serve temporarily in this country bringing with them members of their immediate families as well as employees, attendants, and servants. Officers and employees of international organizations such as the United Nations add to the list of nonimmigrants entering the United States each year. The Glossary contains a detailed definition of nonimmigrants, a listing of each of the nonimmigrant classes of admission, and a detailed definition of each class.

For most nonimmigrant classes of admission there has been an "open door" policy by the U.S. government. There are no restrictions on the total number of admissions in any given year; indeed, tourists (the majority of nonimmigrants) are encouraged to visit as a boon to the U.S. economy. Strict rules do apply, however, regarding the grounds for nonimmigrant admission; regulations, likewise, govern such areas as length and extension of stay, employment in the United States, accompaniment by family members, travel restrictions within the United States, and change of admission status. For example, ambassadors are allowed to remain in the United States for the duration of their service, students to complete their studies, visitors for business for a maximum of six months (plus six-month extensions), and aliens in transit through the United States not more then twenty-nine days (with no extensions). Most nonimmigrants are not allowed gainful employment while in the United States, though exceptions may be granted for example, to students and to family members of international representatives. On the other hand, temporary workers come to the United States expressly for purposes of employment. Most nonimmigrant aliens may bring immediate family members with them; the exception is transit aliens other than foreign government officials. Transit aliens and fiances(ees) coming to the United States to marry U.S. citizens are the only nonimmigrants who are prohibited from changing to another nonimmigrant category while in this country.

The Immigration Reform and Control Act of 1986 revised the existing nonimmigrant class of admission for temporary workers. Those allowed to enter the United States to perform labor or services if unemployed persons capable of performing such labor or services cannot be found in this country were divided into two categories: those to perform temporary agricultural labor or services (as defined by the Secretary of Labor) and those to perform other temporary labor or services. Data for these revised classes of admission are available for the last eight months of fiscal year 1988 (Table 44).

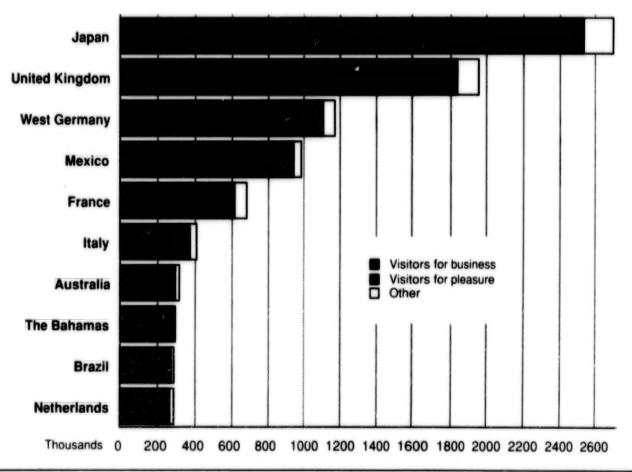

The Immigration Reform and Control Act of 1986 also authorized the establishment of a program which allows certain nonimmigrants from specified countries to enter the United States on a temporary basis without requiring nonimmigrant visas. This visa waiver extends only to approved countries which offer a reciprocal waiver of visas to U.S. citizens. entry in the visitor for pleasure and for business classes of admission, and for a period of ninety days. To date, only citizens of the United Kingdom and Japan qualify for this program. Data are available for the last four months of fiscal year 1988 and only for the United Kingdom. Japan was approved at a later date than the United Kingdom and no entries were recorded for Japan until the beginning of fiscal year 1989. Entries from the United Kingdom during the last third of fiscal year 1988 were 55,407 visitors for pleasure and 3,835 visitors for business. Additional countries will participate in this program as the various criteria are met and data will be provided in subsequent editions of the Statistical Yearbook.

Data Overview

More than 14.6 million nonimmigrants arrived in the United States in fiscal year 1988 (Table 42). Of this total, a large majority (74.2 percent) entered as visitors for pleasure (tourists), with the next highest class of admission, temporary visitors for business, accounting for only 16.3 percent. More than 312,000 foreign students entered the United States to pursue a full course of study (predominantly in academic institutions) accompanied by almost 26,000 spouses and children. In addition, nearly 167,000 entered as exchange visitors to study, teach, or conduct research in the United States, bringing with them more than 36,000 spouses and children.

Nonimmigrants entering the United States in 1988 to represent foreign governments amounted to over 166,000 (about 1.1 percent of total entries). This figure consists of almost 99,000 foreign government officials, families, and attendants (including

Chart F
Nonimmigrants Admitted by Selected Class of Admission from Top Ten Countries of Citizenship
Fiscal Year 1988

Source: Table 43.

ambassadors, public ministers, career diplomats, and consular officers), almost 59,000 foreign representatives, families, and attendants to international organizations, and over 8,000 officials and family members serving the North Atlantic Treaty Organization (NATO).

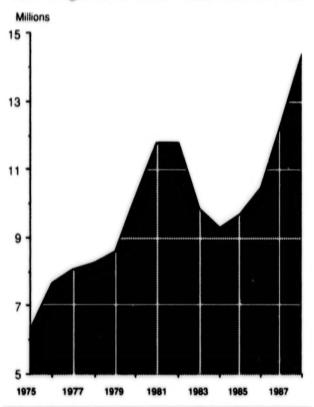

Almost 47 percent of all nonimmigrants arriving in 1988 were citizens of only four countries: Japan (18.5 percent), the United Kingdom (13.4), West Germany (8.0), and Mexico (6.8). Tourists far outnumbered other classes of entry for almost every country of citizenship (Chart F). Eighty-three percent of Japanese nonimmigrants were tourists, compared to fewer than 71 percent of citizens of Italy, and only 46 percent of Chinese (Mainland China and Taiwan) (Table 43). Just as four countries dominated nonimmigrant admissions to the United States in 1988, so did four ports of entry. New York (23.7 percent), Miami (16.7), Los Angeles (10.6), and Honolulu (10.5) together accounted for more than 61 percent of all entrants (Table 46).

As noted, the 1988 total of 14.6 million nonimmigrant arrivals represents an increase of more than two million (18.9 percent) from the previous fiscal year. Total admissions numbered about 6.3 million during 1975 and steadily increased to about 11.8 million in both 1981 and 1982. Total arrivals stabilized at about 9.5 million from 1983 to 1985 (reaching a low in 1984) then began a steady increase between 1985 and 1988 (Chart G).

The overall volume of nonimmigrant arrivals has more than doubled since 1975. Table E shows the countries of last residence which increased the most during the period 1975-88. Visitors (mostly tourists) from Japan, the United Kingdom, and Germany show by far the largest absolute increases. The Bahamas ranks very high, due mainly to a high volume of repeat visits throughout the period. Canada and Mexico do not appear on this list because most of the millions of visitors from these contiguous countries enter under expedited procedures and do not require visas or INS Form I-94s (Arrival/Departure Record) when entering the United States (see section on Data Collection).

Admissions have shown a high degree of seasonality, with most nonimmigrants arriving in the United States in the summer months (peaking in July) and with a lesser but noticeable secondary peak in December. The trends for 1985 through 1988 are illustrated in Chart H.

Data Collection

The Nonimmigrant Information System (NIIS) is an important component of the Servicewide automation that has occurred during the past eight years. The system, now in its seventh year of operation, is designed to provide for each nonimmigrant a record of legal admission and departure, as well as statistics for such variables as age, country of citizenship, class of admission, visa-issuing post, port of entry, and destination in the United States. Many nonimmigrants enter and leave the United States more than once each year and the NIIS system records each entry separately. The system is the largest in the INS with an active data base of over thirty-five million records and an additional "archive" of about thirty million.

Arriving foreign students were included in the NIIS system during its first two years of operation; however, arrival forms for this nonimmigrant class are now processed in a separate automated system, the Student/School System (STSC), designed to produce detailed statistics on foreign-student arrivals, departures, and the foreign-student population in the United States.

A description of the principal steps in the process of nonimmigrant admission to the United States is useful for understanding the data produced by the NIIS/STSC systems. First, a nonimmigrant visa is secured at a U.S. Consulate abroad (except for those entering under the visa waiver program see Nonimmigrant Admission section). Prior to departing for the United States, nonimmigrants are screened initially by the transportation company to assure admissibility. During the trip INS Form I-94 is distributed to non-U.S. citizens. At the port of entry, each arriving nonimmigrant presents a visa and a completed Form I-94 to an immigration inspector. Among other actions, the inspector checks the form for completeness, determines the length of admission, and stamps the class of admission and port of entry on the form. The arrival portion is torn off, retained by the inspector, and sent to a central data processing facility. The matching departure section of the form, usually stapled into the passport, is the nonimmigrant's proof of legal admission to the United States. This section of Form I-94, collected at departure, is also sent to the data processing facility where it is processed and matched to the arrival section of the form.

The Nonimmigrant Information System also includes information on parolees (entering for humanitarian, medical, or legal reasons), withdrawals, stowaways, deferred inspections (admitted to appear at an INS office where formal inspection can be completed), and refugees. Data for these classes of admission are not shown in the nonimmigrant tables but are included in summary form in footnotes to the appropriate tables.

The Nonimmigrant Information System does not include data for permanent resident aliens returning after short visits abroad who are technically defined as nonimmigrants, or for most of the millions of citizens of Canada and Mexico who cross the border for brief periods of time. Most aliens entering the United States from Canada or Mexico do not require any documentation: Canadians may travel for business or pleasure without travel restrictions for a period of six months without requiring nonimmigrant visas; Mexicans crossing the border frequently may apply for border crossing cards which can be used for admission to the United States for business or pleasure within twenty-five miles of the Southwestern border for a period not to exceed seventy-two hours. The procedures used to count border crossers and to determine the citizen/alien breakdown vary significantly among ports (see Entries section).

Limitations of Data

While the development of the current NIIS/STSC data base systems produced a marked improvement beginning in 1983 for the collection and dissemination of data on nonimmigrant arrivals and departures, collection and update procedures create inherent problems and limitations in the data. As mentioned, the data systems record arrivals via collection of INS Form I-94; thus, data represent each arrival event during the year rather than the actual number of individuals admitted. Nonimmigrants in several classes of admission, especially students and visitors for business, often execute multiple entries in any given year.

Thousands 1400 Visitors for pleasure 1200 1000 800 600 400 Other Visitors for business 200 0 July July July Jan. July Jan. Jan. Jan. Jan. 1987 1988 1985 1986

Chart H
Nonimmigrants Admitted by Selected Class and Month of Admission: Calendar Years 1985-88

Recording departures is a major area of concern within the data systems. While nearly all of the arrivals are recorded in the systems, the collection rate for departures, especially at land borders, is considerably lower. This arises predominantly from the fact that arriving nonimmigrants are universally inspected by immigration inspectors, at which time Form I-94 is collected, while departure forms are less likely to be collected. At air terminals, through which ninety percent of visitors depart, the representative of the air carrier rather than an INS official has responsibility for the collection of the departure portion of Form I-94. At land borders there is often no arrangement for the collection of the document. This inconsistency in the collection process is a source of "system error" when arrival and departure records are matched, giving the false indication that many more visitors overstay their period of admission than actually do.

Finally, there are gaps in the historical nonimmigrant data series due to the unavailability of arrival and departure records for July to September 1979, all of 1980, and for most characteristics for 1981 and 1982. Data for country of last residence and class of admission are the only variables available for 1981 and 1982.

VI. NATURALIZATIONS

Naturalization refers to the conferring of U.S. citizenship by a naturalization court or, if the alien is outside the United States, by a representative of the Immigration and Naturalization Service. As part of the naturalization process, applicants pledge an oath of allegiance to the United States, thereby renouncing allegiance to their former countries of nationality.

In fiscal year 1988, 242,063 persons naturalized to become U.S. citizens, a 7 percent increase over the 227,008 persons naturalized in 1987. The three leading countries of birth have remained constant since 1985, although the rankings have changed over time. The Philippines led all countries for persons naturalized in 1988, followed by Mexico and Vietnam. Forty-nine percent of the persons naturalized in 1988 were born in Asia, a slight decrease from the 52 percent in 1987.

Naturalization Policy

In order to naturalize, an immigrant must fulfill certain requirements set forth in the Immigration and Nationality Act concerning age, lawful admission, and residence in the United States. Additional requirements include the ability to speak, read, and write the English language; knowledge of the U.S. government and U.S. history; and having good character. The general naturalization provisions specify that an alien must fulfill the following conditions: be at least eighteen years of age; have been lawfully admitted to the United States for permanent residence; and have resided in the country continuously for at least five years. These minimum requirements must be met for an alien to be considered for naturalization under the general provisions of immigration law. Over eighty-five percent of immigrants currently naturalize under the general provisions. The remaining immigrants who naturalize do so under the special provisions of the law (Chart I).

The special provisions of naturalization law exempt aliens from one or more of the requirements of the general provisions. Spouses and children of U.S. citizens and military classes constitute the main special naturalization categories. The majority of people naturalizing as spouses of U.S. citizens may do so in three years rather than the prescribed five

years required under the general provisions. Children who immigrate with their parents generally do not naturalize, but derive their U.S. citizenship through the naturalization of their parents. Children adopted by U.S. citizens may naturalize to become U.S. citizens, although they are no longer required to do so, since they are eligible to derive U.S. citizenship. These children may naturalize prior to reaching age eighteen with no residency requirements necessary after having been admitted for lawful permanent residence. Aliens who served honorably during World War I, World War II, the Korean Conflict, the Vietnam Conflict, or the Grenada Campaign, under certain conditions, may naturalize without prior admission to permanent resident status. Also, they need not have resided in the country for a particular length of time. Although there are other special naturalization categories, those specified above currently account for over ninety percent of the naturalizations under special provisions.

Every applicant for naturalization in the United States must file an application for naturalization: Form N-400 (Application to File Petition for Naturalization) or Form N-402 (Application to File

Chart I Persons Naturalized by Provision of Law: Fiscal Years 1908-88 Thousands 450 Special provisions and unknown 375 General provisions 300 225 150 75 0 1928 1938 1948 1958 1968 1978 1908 1918 1988

Petition for Naturalization in Behalf of Child). All aliens filing these applications who appear to meet the naturalization requirements must be interviewed by an INS officer to determine their eligibility to naturalize. During the interview the officer discerns the applicant's knowledge and understanding of the English language as well as of the history and government of the United States. Those applicants found qualified are scheduled for a final hearing before a judge who performs the naturalization ceremony.

Data Overview

As the sending areas of immigrants admitted to the United States have shifted, so have the origins of persons naturalized. Data by region of birth indicate

that major changes have occurred between 1951 and 1988 (Chart J). Naturalizations for Europe, the leading region through 1970, declined by nearly seventy percent from the 1950s through the 1980s, while naturalizations for all other regions combined more than tripled during the same period. The Immigration and Nationality Act of 1952 removed all racial restrictions on naturalization, thus allowing increases in naturalizations for regions other than Europe. Asia has become the leading region of birth representing nearly fifty percent of all naturalizations for the 1981-88 period. The predominance of Asia as the region of origin for naturalizations echoes the increase in immigration from Asia as a result of the Immigration and Nationality Act Amendments of 1965 and the arrival of Indochinese refugees beginning in 1975.

Chart J
Persons Naturalized by Decade and Selected Region of Birth: Fiscal Years 1951-88

Source: 1988, Table 57; 1951-87, previous yearbooks.

Since most naturalizations occur under the general provisions of naturalization law, the majority of aliens naturalizing must have resided in the United States for at least five years as lawful permanent residents. The median number of years of residence for the total naturalized population has remained fairly constant over the last thirty years, at about eight years. Major differences, however, are evident among regions (Table F).

Median lengths of residence in 1988 ranged from seven years (Asia and Africa) to twelve years (North America). Historically, there have been shifts in the median years of residence, as with Europe, North America, and South America. In general, however, Asians and Africans tend to naturalize soon after they are eligible to do so, while aliens from other regions remain in the United States as lawful permanent residents for longer periods of time prior to naturalizing.

Data on naturalizations by selected country of birth for the 1970-79 immigrant cohort reveal major differences in naturalization rates by country (Chart K). The naturalization rates range from Canada, with 10.4 percent of the immigrant cohort having naturalized through fiscal year 1988, to Vietnam with 70.7 percent. Of the 15 leading immigrant-sending countries for the 1970-79 period. Asian countries have the highest naturalization rates. In addition to Vietnam, China (Mainland and Taiwan) (61.1 percent), the Philippines (60.4), Korea (55.3), and India (46.3) are the countries with the highest rates of naturalization. The two countries with the lowest rates are contiguous to the United States -Canada and Mexico (12.0 percent). Other countries within North America have higher rates of naturalization, such as Cuba (26.1 percent) and

Jamaica (28.0 percent). European naturalization rates range from 18.0 percent for the United Kingdom to 36.0 percent for Greece. The data by country are consistent with the data on median years of residence by region, which show that, as a group, Asians and Africans naturalize more quickly than persons from other regions.

Data Collection

Data on persons naturalized in the United States are collected by approximately sixty-five INS offices where aliens intending to naturalize may file their applications. The INS collects two types of data on naturalizations: workload statistics and data on the characteristics of aliens who have naturalized. The workload data consist of the number of naturalization applications received, the number of petitions filed with courts, as well as the number of aliens naturalized during a fiscal year. These data are collected by each INS office as part of the Service's work measurement data (see Entries section).

Data on the characteristics of aliens naturalized in a fiscal year also are collected by INS offices where aliens file their naturalization applications. These detailed characteristics are collected either through the manual coding of data from the naturalization application or through the automated Naturalization Casework System (NACS), an application tracking system which has been implemented in several of the larger INS offices. The data collected on aliens naturalized include demographic variables (e.g., date and country of birth, sex, marital status, and occupation) as well as immigration-oriented variables (e.g., date of admission for permanent residence and section of naturalization law).

NOTE: China includes Mainland China and Taiwan.

Limitations of Data

In addition to birth in the United States, there are four ways of becoming a U.S. citizen, including: naturalization in a court ceremony; derivation through the naturalization of parents; acquisition at birth abroad to citizen parents; and legislation naturalizing certain groups of persons. Data on naturalizations collected by the INS cover those aliens who have naturalized in court ceremonies each fiscal year. Individuals who derive or acquire U.S. citizenship currently are not included in the data collected by the INS. The Service has designed a new procedure for collecting complete statistics on individuals deriving U.S. citizenship each fiscal year. The new collection system will be implemented beginning October 1989. Aliens who become U.S. citizens through the legislative process are not covered by data collected by the INS. A recent example of the legislative procedure occurred upon the dissolution of the Trust Territory of the Pacific through which the Northern Mariana Islands became a commonwealth of the United States, making its residents U.S. citizens.

The data on naturalizations reported in the Statistical Yearbook of the INS are based on the number of actual naturalizations for which detailed characteristics are available. A second figure for naturalizations generally is reported in the Annual Report of the INS. The latter figure is the number compiled from the Service's workload measurement system, which represents only an approximation of naturalizations approved during a fiscal year. The workload data are released as preliminary numbers used principally for budget and planning purposes. For 1988 the workload data reported that 241,896 naturalizations were approved during the fiscal year, while the characteristics data indicated that 242,063 persons were actually naturalized.

XXXVII

VII. ENFORCEMENT

This section covers a variety of actions that the Immigration and Naturalization Service groups as enforcement: apprehensions, expulsions, and exclusions. Apprehensions are arrests of aliens in violation of the Immigration and Nationality Act. If an alien is to be removed from the country, that removal may be effected by one of several means. The best known is deportation; however, most aliens are actually removed under a process called "voluntary departure with safeguards". Under this procedure an alien admits to illegal status and agrees to leave the United States. The alien further agrees to remain in custody until departure, which is observed by an officer of the INS. If the alien refuses the offer of voluntary departure, or if no such offer is made, the alien is entitled to a hearing and is placed under "docket control" (an INS office takes control of the processing of the case and a file is created on the alien). An officer documents the grounds for deportability and prepares a case that may eventually be argued before an immigration judge. During this process an alien may be offered voluntary departure and, if accepted, the expulsion is known as a "required departure under docket control". In some cases the offer of voluntary departure will not or cannot be made; those cases may result in deportation. Other possible outcomes include adjustment to a legal status, a stay of deportation (such as the stays currently given to Polish nationals and others), or an alien who absconds. A deported alien may not be admitted to the United States for a period of five years after deportation unless the Attorney General grants a waiver of the prohibition. An apprehended alien who accepts the offer of voluntary departure and pays the expense of departing can be legally admitted in the future without penalty.

The Immigration and Naturalization Service has the initial responsibility for determining who may be admitted to the United States. In the past, the *Statistical Yearbook* included statistics for only those aliens who had been denied entry after a formal exclusion hearing before an immigration judge. However, the overwhelming number of aliens who fail to gain admission are those who withdraw their application during the inspection process after the INS presents evidence that they are inadmissible to the United States. Large numbers of aliens withdraw during primary inspection and even larger numbers withdraw during secondary inspection.

Apprehensions

The Immigration and Naturalization Service recorded slightly more than 23 million apprehensions from 1951 through 1988. Apprehensions increased dramatically during the 1970s, reaching a total of 8.3 million for the decade. Apprehensions continued to increase during the 1980s with fiscal year 1986 establishing an historical high of 1.8 million. In 1987, apprehensions returned to the level recorded in 1983-84. (Chart L). Apprehensions declined another 15 percent in 1988. The INS statistics on apprehensions include individuals who have been apprehended more than once during the reporting year.

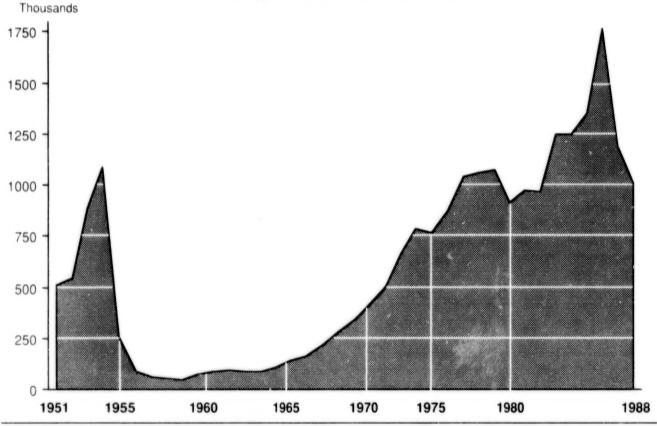

Through fiscal year 1986, the INS data on apprehensions included very little demographic data. For example, only incomplete information was available about the age-sex distribution, occupation, or nationality of apprehended aliens. In order to improve these statistics, the INS began to compile data from Form I-213 (Record of Deportable Alien) which it completes for each apprehended alien. A pilot test in March 1986 demonstrated that useful information could be compiled from a sample of these forms. The sample was begun on a regular basis in November 1986 and continued throughout 1987. Although data collection has been discontinued, some of the demographic data from fiscal year 1987 can probably be generalized to 1988.

The sample data show that nonMexicans apprehended in fiscal year 1987 were slightly older than apprehended Mexicans; the median ages were 25.5 and 22.5 years, respectively. Apprehended Mexicans were overwhelmingly male (90 percent). Among nonMexicans more males than females were apprehended, but the proportion of women was substantially higher. For example, 28 percent of Salvadorans were female as were 23 percent of Hondurans, 46 percent of Nicaraguans, and 42 percent of Colombians.

The work experience of apprehended aliens would be of interest for examining the labor market impact of illegal immigration. Unfortunately, most I-213 forms are not specific about the work status of apprehended aliens because most aliens are apprehended by the Border Patrol as they cross the border. These aliens generally claim to be seeking work and are most often recorded simply as "laborers".

In fiscal year 1987 the INS began collecting and reporting the nationality and other information about each apprehended alien. The 1988 data included 162 nationalities. Aliens from Mexico dominated the statistics on apprehensions, accounting for 94 percent of the total. The next largest sending countries were El Salvador, Guatemala, Canada, Honduras, the Dominican Republic, Nicaragua, and Colombia.

Chart L Aliens Apprehended: Fiscal Years 1951-88

Source: Table 60. See Glossary for fiscal year definitions

One problem with the current data is that it is not possible to link apprehensions with dispositions (expulsion, adjustment of status, etc.). Expulsion proceedings take time, and final disposition of the case may occur in some later fiscal year. An automated case tracking system is in the planning stage; therefore, in future years it might be possible to link apprehensions with dispositions.

Expulsions

Many of the tables in this Statistical Yearbook treat deportations and required departures separately. Since both are expulsions, this description will treat them together. The INS enumerates the third and largest category of expulsions, voluntary departure under safeguard, for workload management purposes and little information is available on this group. The bulk of these removals are of Mexican nationals who are returned across the southern border soon after their apprehension.

This *Yearbook* includes two tables (64 and 67) that show the *calendar* year of *actual* expulsion. Tables in yearbooks before 1986 display only statistics for the *fiscal* year of *verification* of expulsion.

Expulsions under docket control (Calendar year, actual)

1980	58,371
1981	68,983
1982	61,983
1983	59,317
1984	55,408
1985	60,575
1986	44,866
1987	33,011
1988	22,731
1985 1986 1987	60,575 44,866 33,011

If statistics on all voluntary departures were iricluded, the figures above would be much higher. For instance, in 1988 voluntary departures under safeguard numbered almost 901 thousand.

Although apprehension data by nationality are not available before 1987 for most nationalities, the number of expulsions can serve as a surrogate measure. A relatively large number of expulsions are recorded for certain nationalities. There are four basic patterns to the expulsion history of these nationalities. Several have demonstrated fairly steady declines in the number of expulsions:

The United Kingdom, Iran, Mexico, Canada, and the Philippines. Some nationalities had a peak number of expulsions in 1985: Jamaica, Colombia, the Dominican Republic, and Haiti. Two reached a peak in 1985, held at that level in 1986 and then declined: Guatemala and Honduras. Two had peaks in the early 1980s, a decline thereafter, and a resurgence in 1985 and 1986: El Salvador and Ecuador. The number of expulsions for these countries also dropped rapidly after 1986. The consistency of post-1986 declines clearly indicates that 1986 was an exceptional year.

In 1987, the last year for which reasonably complete data are available, the INS expelled aliens from 138 countries; 24 had more than 100 expulsions each. Mexican nationals were by far the most numerous, accounting for 51 percent of all expulsions under docket control. The top 10 nationalities accounted for 85.1 percent of all expulsions:

Country	Number	Percent of total
Mexico	16,841	51.0
El Salvador	4,158	12.6
Guatemala	2,397	7.3
Colombia	1,518	4.6
Honduras	1,176	3.6
Dominican Republic	533	1.6
Jamaica	447	1.4
Canada	412	1.2
Philippines	331	1.0
Peru	286	.9

The data on expulsions (under docket control) reported in this and other Statistical Yearbooks must be used cautiously. One problem is the time lag in reporting expulsions. This time lag is different for deportations and required departures. Slightly more than 95 percent of the deportations reported in fiscal year 1988 actually occurred in that fiscal year; 4 percent were in fiscal year 1987 and the rest occurred earlier. Only 58 percent of the required departures reported in fiscal year 1988 actually took place in fiscal year 1988; 26 percent were in fiscal year 1987, 9 percent in fiscal year 1986, and the rest were earlier. The reporting lag results primarily from a delay in receiving verification that an alien has left the country. As a result, the statistics may give a misleading impression about the numbers of aliens expelled in any given year. Therefore, beginning in 1986 the Yearbook has shown data by calendar year of actual expulsion. However, such data will need to be continuously updated and cannot be considered complete for at least four years. The fiscal year data are retained for comparison with previous yearbooks.

Another area of caution involves the types of data on expulsions that the INS collects. The INS originally designed these data sets for administrative use, hence their analytical value for other purposes is limited. The "cause" for expulsion (Tables 65 and 69) reflects only the final charge upheld against an alien. The INS pursues (or accepts) lesser charges when it is in the government's interest to do so. Most aliens are charged with illegal entry or violation of nonimmigrant status, but some of those cases initially carried more serious charges (e.g., climinal or narcotics charges). Finally, the destination and nationality of an expelled alien need not match. The inconsistency rate in fiscal year 1988 is 2.2 percent for deportations and 14.0 percent for required departures.

Exclusions

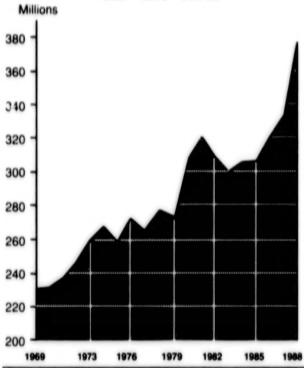

There are a number of opportunities for an alien to withdraw a request for admission to the United States prior to the formal exclusion process before an immigration judge. In fiscal year 1988, 313,007 aliens withdrew during the primary inspection process. Another 486,340 aliens withdrew during secondary inspection. Only 7,936 aliens continued their cases before an immigration judge. Of this latter group, 2,391 aliens were formally excluded.

The INS has detailed data for only those aliens who are formally excluded. These data are limited, with only country of birth and cause of exclusion being of general interest. Four countries account for slightly more than 52 percent of all exclusions: Mexico (468), Haiti (344), The Dominican Republic (261), and Colombia (179).

VIII. ENTRIES

An estimated 377 million people (aliens and citizens) were admitted across U.S. borders during primary inspection in fiscal year 1988, or 13.0 percent above the estimate for 1987. The INS has admitted roughly 300 million persons each fiscal year since 1980 (see Chart M). Individuals seeking entry into the United States are inspected at ports of entry by immigration officers who determine their admissibility. Approximately 90 percent of the 1988 increase in primary admissions was due to increases in alien and citizen border crossings from Canada and Mexice.

Chart M
Estimated Primary Inspection Admissions:
Fiscal Years 1969-88

Source: 1988, Table 74; 1986-87, previous yearbooks; 1969-75, unpublished data. See Glossary for fiscal year definitions.

Inspections

The inspection process involves all work performed in connection with the entry of aliens and U.S. citizens into the United States, including preinspection performed by the INS outside the United States. An inspector is responsible for determining the nationality of each applicant for admission. U.S. citizens are automatically admitted upon verification of citizenship; aliens' documents are inspected to determine admissibility based on requirements of the U.S. immigration law.

The two main functions within the inspections operation are classified by the INS as primary and secondary inspections. Primary inspection is conducted to decide admissibility at initial contact with the applicant; the person is admitted when no further action or additional documentation is needed. Secondary inspection occurs when grounds for admissibility cannot be established during primary inspection. Those who do not meet requirements for admission are ultimately excluded or denied entry into the United States. There were an estimated 313,000 aliens denied entry during primary inspections in fiscal year 1988. Approximately 83 percent of these denials occurred at land border ports of entry (see Enforcement section for expulsion statistics).

All individuals inspected fall into one of two categories, alien or U.S. citizen. Within these categories, statistics are maintained on border crossers, crewmen, and documented aliens. Border crossers are generally those aliens or U.S. citizens who enter the United States from Canada or Mexico for brief visits or in a commuter status. Crewmen include aliens or U.S. citizens who are employed on a vessel or aircraft operating between U.S. territories and foreign countries. Documented aliens are individuals entering the United States, generally from countries other than Canada or Mexico, who arrive with various kinds of supporting documents, such as legal permanent residence documents, refugee travel documents, or immigrant or nonimmigrant visas.

Data Overview

Of the estimated 377 million primary admissions in fiscal year 1988, 60 percent were estimated to be aliens and 40 percent U.S. citizens. The estimate for citizens increased by 15 million while that for aliens increased by 29 million compared to 1987. Approximately 65 percent of the increase in the number of aliens admitted was due to increased admissions at southern ports of entry; less than one quarter was due to an increase in the number of alien entries at northern ports of entry.

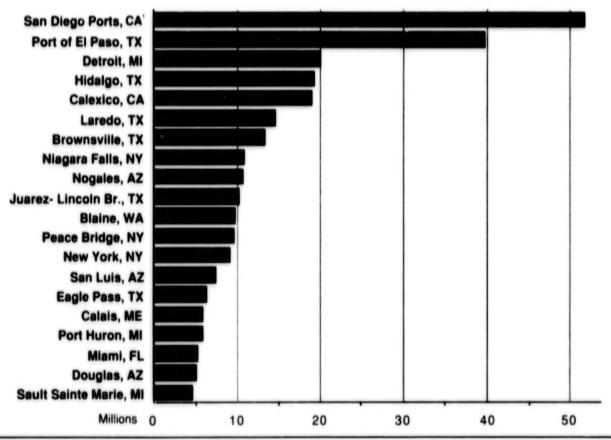

Total estimated alien admissions (226 million) consisted of 89.9 percent border crossers, 1.6 percent crewmen, and 8.5 percent documented aliens. Citizen admissions (151.3 million) were 87.0 percent border crossers, 1.2 percent crewmen, and 11.8 percent entries from other than Canada or Mexico.

As in the previous fiscal year, Texas and California accounted for over 50 percent (199.2 million) of total admissions in 1988 with San Diego Ports, California and El Paso, Texas registering the largest numbers at 51.8 and 39.5 million, respectively (see Table 74 and Chart N).

Data Collection

Data on inspections are compiled from INS Form G-23 (Report of Field Operations), a management report showing workload and resource summaries for most INS central office and field activities. The report is currently created using manual input procedures. The process begins when employees fill in daily workload forms. Consolidated office-level forms are mailed from over 200 inspection ports of entry to the INS central office in Washington, D.C. for

Chart N
Estimated Primary Inspection Admissions for Top Twenty Ports of Entry: Fiscal Year 1988

¹ Includes San Ysidro, Otay Mesa, Tecate and San Diego ports of entry. Source: Table 74.

monthly processing. The reporting cycle takes about six weeks from the time data are collected in the field to the time reports are produced and distributed. Data from Form G-23 are also used to construct the *Statistical Yearbook* tables on deportable aliens located (see Enforcement section).

Limitations of Data

The error associated with estimating the total number and distribution of aliens and U.S. citizens has not been determined, due partly to the variation in estimation methodologies applied at each port of entry. In the future, these statistics should be more accurately collected as a byproduct of an expanded inspections intelligence system. Until such improvements are made, caution must be used in the interpretation of these data. The admission figures for aliens and citizens should, at best, be considered estimates that contain unspecified measurement error.

Table 74 shows admissions by state and port of entry for 1988. The table includes estimated total admissions at primary inspection instead of just border crossers as was shown in the 1985 Yearbook. A table for border crossers, generally consistent with previous years (but not included in this report), has been compiled for 1988 for use as a reference table (available upon request)

IX. PUBLIC USE TAPES

Information on aliens granted immigrant status may be purchased on magnetic tapes or diskettes from the National Technical Information Service (NTIS). These tapes contain information on immigrants admitted from fiscal years 1972-88. The data files come on six tapes, each covering a three-year span. The variables included on the tape for fiscal years 1984-88 are:

- · Port of entry
- Month of admission
- Year of admission
- Class of admission
- Age
- · Country of birth
- · Marital status
- Sex
- Nationality
- Occupation
- · Type of case

- Country of chargeability
- Labor certification
- Country of last permanent residence
- Nonimmigrant class of entry
- Nonimmigrant year of entry
- INS district of intended residence
- Zip code of intended residence

The source tape is formatted in EBCDIC character set and is available in 9 track 1600 bpi or 6250 bpi. Documentation is also included with the tape by year. For information on how to order the tapes or diskettes, please call the Computer Products Office of the NTIS at (703) 487-4763.

The Statistical Yearbook may also be purchased from the NTIS in paper copy or microfiche form beginning with fiscal year 1965. Prior to 1978, INS statistical data were included in the Annual Report of the Immigration and Naturalization Service. Those reports contain descriptions of INS' activities and accomplishments in addition to the statistical tables. To order, call the NTIS at (703) 487-4650.

X. DATA GAPS

Although the Immigration and Naturalization Service's capability for processing and distributing information about immigrants, temporary visitors, and other categories of international migrants has increased in recent years, gaps remain in our knowledge about the flow of immigration to and from the United States. In some areas these deficiencies persist because of the inherent difficulty in estimating the numbers, as is the case for emigration and illegal immigration. As a result, no information about either of these two categories is included in the *Statistical Yearbook* tables.

Emigration

The collection of statistics on emigration from the United States was discontinued in 1957; no direct measure of emigration has been available since then. Estimates compiled in this country and statistics collected by other countries demonstrate that

emigration from the United States has continued, and probably increased considerably, since the 1950s.1

The estimates indicate that the average flow of alien emigration has exceeded 100,000 per year since 1970. These figures are consistent with U.S. historical experience; between 1900 and 1980, approximately 30 million immigrants were admitted, and an estimated 10 million foreign-born persons emigrated. The U.S. Bureau of the Census currently uses an annual emigration figure of 160,000, which includes both citizens and aliens, for computing national population estimates.

Information about emigration from this country has been developed from statistics collected in the INS alien registration, annual immigration data collected by other countries of the world, and tabulations of census data in the United States and other countries. These data sources are deficient for deriving current estimates of U.S. emigration because of their lack of timeliness, incomplete coverage of international migrants, and unspecified or inconsistent definitions of immigration. More current and accurate figures are needed to develop and evaluate U.S. immigration policy, to derive accurate national and local population estimates, and to measure coverage of the decennial censuses. Two data collection activities - sample surveys conducted by the Census Bureau and arrival/departure forms collected by the INS - have the potential for providing current information about emigration from the United States.

Illegal Immigration

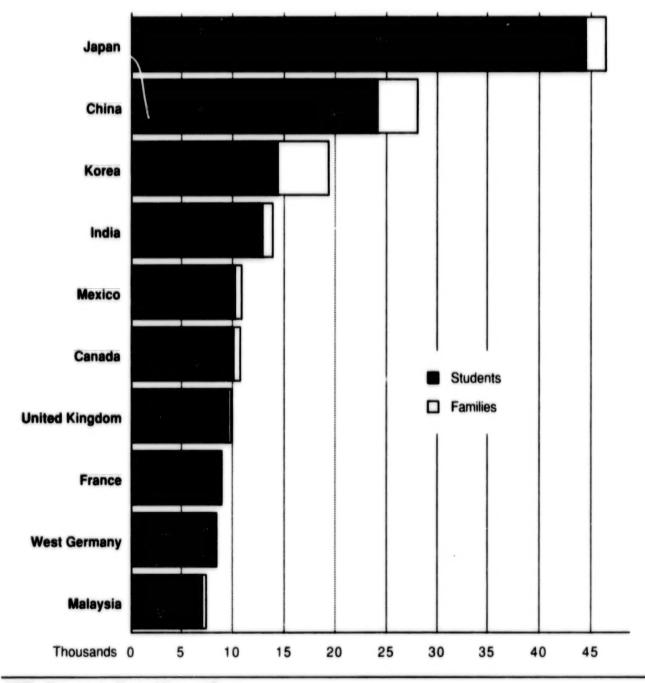

The annual INS Statistical Yearbook does not include statistics on the number of illegal aliens entering or residing in the United States. The term "illegal alien" could be broadly defined as any foreign-born person present in the United States who is in a deportable status, including, for example, a tourist who departed a day or two late. The term could be more narrowly defined to include only those who have established residence and intend to remain here permanently. Obviously, the size of this population would vary considerably depending on the definition used.

¹ Warren, Robert and Ellen Percy Kraly, 1985, The Elusive Exodus: Emigration from the United States, Population Trends and Public Policy Occasional Paper No. 8, March, Population Reference Bureau: Washington, D.C.

The most reliable data available indicate that the resident illegal population was in the range of about 2.0 to 3.5 million in 1980. The population grew to about 4.0 to 5.0 million in early 1987; after the legalization program (created by Immigration Reform and Control

Act of 1986) ended in December 1988 the illegal population was reduced to approximately 1.5 to 3.0 million. Future growth or decline of the resident illegal population will depend partly on the effectiveness of the Immigration Reform and Control Act.

NOTE: The numbers shown are as follows: from 1820-67, figures represent alien passengers arrived at seaports; from 1888-91 and 1895-97, immigrant aliens arrived; from 1892-94 and 1898-1988, immigrant aliens admitted for permanent residence. From 1892-1903, aliens entering by cabin class were not counted as immigrants. Land arrivals were not completely enumerated until 1908. See Glossary for fiscal year definitions.

¹ Data for years prior to 1906 relate to country whence alien came; data from 1906-79 and 1984-88 are for country of last permanent residence; and data for 1980-83 refer to country of birth. Because of changes in boundaries, changes in lists of countries, and lack of data for specified countries for various periods, data for certain countries, especially for the total period 1820-1988, are not comparable throughout. Data for specified countries are included with countries to which they belonged prior to World War I.

² Data for Austria and Hungary not reported until 1861.
³ Data for Austria and Hungary not reported separately for all years during the period.
⁴ No data available for Czechoslovakia until 1920.

- Prior to 1926, data for Northern Ireland included in Ireland. Data for Norway and Sweden not reported separately until 1871.
- No data available for Romania until 1880.
- Since 1925, data for United Kingdom refer to England, Scotland, Wales, and Northern Ireland.
- In 1920, a separate enumeration was made for the Kingdom of Serbs, Croats, and Slovenes. Since 1922, the Serb, Croat, and Slovene Kingdom recorded as Yugoslavia.
 - Beginning in 1957, China includes Taiwan
 - Data not reported separately until 1952.
- Data not reported separately until 1925.
- Data not reported separately until 1949.
- No data available for Japan until 1861.
- Data not reported separately until 1948.
- Prior to 1934, Philippines recorded as insular travel. Prior to 1920, Canada and Newfoundland recorded as British North America. From 1820-98, figures include all British North America possessions.
 - Land arrivals not completely enumerated until 1908.
 - No data available for Mexico from 1886-93
- Data not reported separately until 1932.
- Data for Jamaica not collected until 1953. In prior years, consolidated under British West Indies, which is included in "Other Caribbean."
- Included in countries "Not specified" until 1925.
- From 1899-1919, data for Poland included in Austria-Hungary, Germany, and the Soviet Union.
- From 1938-45, data for Austria included in Germany.
- ²⁵ Includes 32,897 persons returning in 1906 to their homes in the United States.
 - Represents zero.

NOTE: From 1820-67, figures represent alien passengers arrived at seaports; from 1868-91 and 1895-97, immigrant aliens arrived; from 1892-94 and 1898-1988, immigrant aliens admitted for permanent residence. From 1892-1903, aliens entering by cabin class were not counted as immigrants. Land arrivals were not completely enumerated until 1908.

See Glossary for fiscal year definitions. For this table, fiscal year 1843 covers 9 months ending September 1843; fiscal years 1832 and 1850 cover 15 months ending December 31 of the respective years; and fiscal year 1868 covers 6 months ending June 30, 1868.

Total, other classes Children born abroad to alien residents (NA3) American Indians born in Canada (S13) Children born subsequent to issuance of visa (XA3)							

Although nonpreference visas (NP1 and NP6) have been unavailable since 1978, there were 7 nonpreference immigrants admitted in fiscal year 1985 and 3 in fiscal year 1987. These cases were filed prior to 1978, were denied by the INS, but were appealed through the judicial system.

The 389 suspension of deportation (Z11) immigrants reported in fiscal year 1986 include 192 immigrants who actually immigrated in fiscal year 1985.
Prior to fiscal year 1987 aliens must have entered before 6/30/48 to be eligible for Section 249.

Represents zero. X Not applicable.

Includes suspension of deportation adjustments, private law adjustments, and foreign government official adjustments which are subject to numerical limitations. Includes nonpreference new arrivals and adjustments.

- Represents zero.

NOTE: Class of admission categories (subject to numerical limitations):

¹st pref. - Unmarried sons and daughters of U.S. citizens and their children.

²nd pref. - Spouses, unmarried sons, and daughters of o.s. citizens and their children.

4th pref. - Married sons and daughters of U.S. citizens and their spouses and children.

5th pref. - Brothers and sisters of U.S. citizens and their spouses and children.

ord pref. - Professionals or highly skilled workers (principals).

3rd pref. - Spouses and children of principals (beneficiaries).

6th pref. - Workers in short supply (principals).

⁶th pref. - Spouses and children of principals (beneficiaries).

Other	452	863	893	979	628	1,095	1,265

Data for Mainland China and Taiwan are included in China.

Represents zero.

NOTE: Beginning in 1987, refugee admission data were compiled through the Nonimmigrant Information System. Since the system collects all entries of persons with nonimmigrant status, initial arrivals of refugees may be overstated. In 1988, approximately 700 reserve slots were used to admit Cuban refugees.

NOTE: Data for fiscal years 1980-81 are not available. Beginning in 1987, refugee admission data were compiled transplint the Noticiangrant Information System. Since the system collects all entries of persons with nonimmigrant status, initial arrivals of refugees may be overstated.
